

Water Treatment Method for
SWIMMING POOLS
With **OXYDES & KATALOX - LIGHT**

June 2013

For a total Toxin free + Chlorine free swimming

Enjoy swimming with a new Type of crystal clear filtration for pools which is called

OXYDES + KATALOX - LIGHT

Direction of use

1. Start circulation pump
2. Allow pump to run for 20 minutes
3. Add ½ kg of **OXYDES** per 5000 liters of pool water by spreading around the pool. Water will form bubbles as the **OXYDES** dissolves and the suspended solids and algae will float up to the water surface.
4. Allow pump to run for 24 hours and make sure the sand filter is changed to **KATALOX - LIGHT**. (After changing to **KL** backwash for 20 mins.)
5. After running the pump for 24 hours backflush pump at least once during this period.
6. Repeat the process by putting 200 grams of **OXYDES** per 5000 liters of pool water once a week (directly in the skimmer).
7. Jump into your oxygen pool and after few minutes you will feel relaxed, refreshed and revitalized.
8. You will feel the oxygentation rather than tired from toxic chlorine.

This unique technology uses **OXYDES** and the **KATALOX - LIGHT** filtration for a **100% chlorine free** pool-treatment.

Chlorine Free

Swimming Pools Treatment with „Solid“ source of oxygen

OXYDES is	+	KATALOX LIGHT is
Crystalline INSTANT Powder of H ₂ O ₂ and is <u>developed by WATCH®</u>	+	Heterogenous Catalyst with Filtration media and is <u>developed by WATCH®</u>
An unique and concnetrated solid form source of OXYGEN	+	Solid catalyst to decompose OXYDES to produce Oxygen which provides a filtration down to 2-3 micron
Easy to handle	+	Easy to Backwash
Easy for transport	+	Light weight
Easy to use	+	Ready to use after 2 minutes of backwash
No Disinfection byproducts	+	Long service life

Advanced Oxidation with OXYDES + KL

Oxidative reaction is the most effective way of degrading and eliminating all kinds of pollutants in swimming pool water. Only in this process the highest oxidation potential can be achieved which removes all **Toxic** and non-degradable materials.

OXYDES in combination with KATALOX - LIGHT

The combined **OXYDES** + **KL** can remove aromatics, pesticides, petroleum constituents, volatile organic compounds (VOC), chlorinated hydrocarbons, organic matter and all kinds of bacteria and viruses. Watch®'s „**Catalytic Advanced Oxidation**“ that is capable of generation of incomparable quantity of hydroxyl radicals through Catalytic decomposition of solid Instant **OXYDES** (H_2O_2). Watch®'s unique **KATALOX - LIGHT** filter media is based on TWO-IN-ONE technology. Best filtration and a catalyst. As a result, it is capable of abundant generation of **Oxygen** with decomposition **OXYDES**, thus giving this method an exceptional oxidative capability. It is in a form of solid granulate and it does 2 - 3 micron filtration. Our Advanced Oxidation process is able to decompose and mineralize organic and all inorganic contaminants in **SWIMMING POOLS**.

OXYDES in combination with KATALOX - LIGHT

(continues from slide 5)

Our technology provides very high filtration efficiency and low cost. **KATALOX - LIGHT** is stable and can run for 10 years. It requires no pH adjustments. It is much more powerful than OZONE. Decomposition of ozone requires high pH >10. The ozone treatment is also relatively expensive.

OXYDES + KATALOX - LIGHT is an ideal tool for Swimming Pool purification because it does not introduce any harmful chemicals, such as **chlorine** or compounds that contributes to the negative pH (e.g. Sodium bicarbonate).

OXYDES and KATALOX - LIGHT

- ✓ TWO-IN-ONE
- ✓ Extraordinary crystal clear filtration (2-3 micron)
- ✓ Extremely less backwash 500 times less than sand or Atrazine
- ✓ Does not introduce any by products
- ✓ Works in the whole range of pH
- ✓ Keep pools neat and clean

KATALOX-LIGHT media/filter

100% ability to remove metals that cause bad stains in pools, it removes bad odors, bad taste of chlorine. It also removes iron, copper and manganese.

KATALOX - LIGHT provides effective filtration against all radio nuclides, metals such as uranium, iodine, cesium, plutonium and radium as well as organic compounds such as **CARCINOGENIC** compounds.

OXYDES – Oxidize on KL Filter Media

Heavy metals such as arsenic, lead, chromium and mercury. **OXYDES** remove and oxidizes all kinds of bacteria and their toxins from swimming pool water to reduce all kinds of risk of dermatitis.

OXYDES and **KATALOX - LIGHT** has ability to make cleaner and safer water for drinking, swimming, washing, bathing and cooking.

Did you know?

Thousands of swimming pool filters are based on sand filtration. **KATALOX - LIGHT** is thousand times better than any sand filter in the market. **KATALOX - LIGHT** removes all toxic metals from water which are badly **carcinogenic** to **SKIN**.

Metals become toxic when absorbed through **SKIN**. Chlorinated metals and pesticides and polychlorinated Biphenyls (PCBs) are stored in fatty tissue and accumulate over a swimmers lifetime.

Heavy metal toxicity in swimming pools can lead to hormonal imbalance, immune system dysfunction, pool heating and nerve and brain damage, fatigue, muscle pain and digestive problems can all occur.

Conclusion

If you want to increase your fun, energy and all the benefits of your swimming pool without getting serious health problems, than please **change SAND** in your filters **with KATALOX - LIGHT** and **chlorine** **against OXYDES** and enjoy all the health benefits of **OXYGENATION**.

*“Call our world wide distributors and branches if you want to have a healthier life. You cannot buy health but live a healthy life with **MORE OXYGEN.**”*
