

TRAPPSORB® Installation/Operation Manual

14.01.20

TRAPPSORB® media should be properly backwashed and rinsed before placing into service. Requirements for **Top & Bottom** distributors **0.5 mm**

Note: Maintenance of system during stagnant period, backwash is recommended at least once a week to avoid any pressure drop.

Installation Basic (for first time installation only!)

1. Open the new bag of **TRAPPSORB®** media and put into the pressure vessel.
2. Fill up the pressure vessel slowly with water to the top distributor leaving 1-3 cm distance.
3. Start backwashing the media up to 10-15 minutes (or until backwash water appears clear) at 28 – 30 m/h [11 – 12 gpm/ft²].
4. After backwash is complete. Perform fast rinse for 2 - 5 minutes @ 10 m/h [4 gpm/ft²]
5. Service Flow Direction: Up Flow
