

CARBONBLOCK TS3

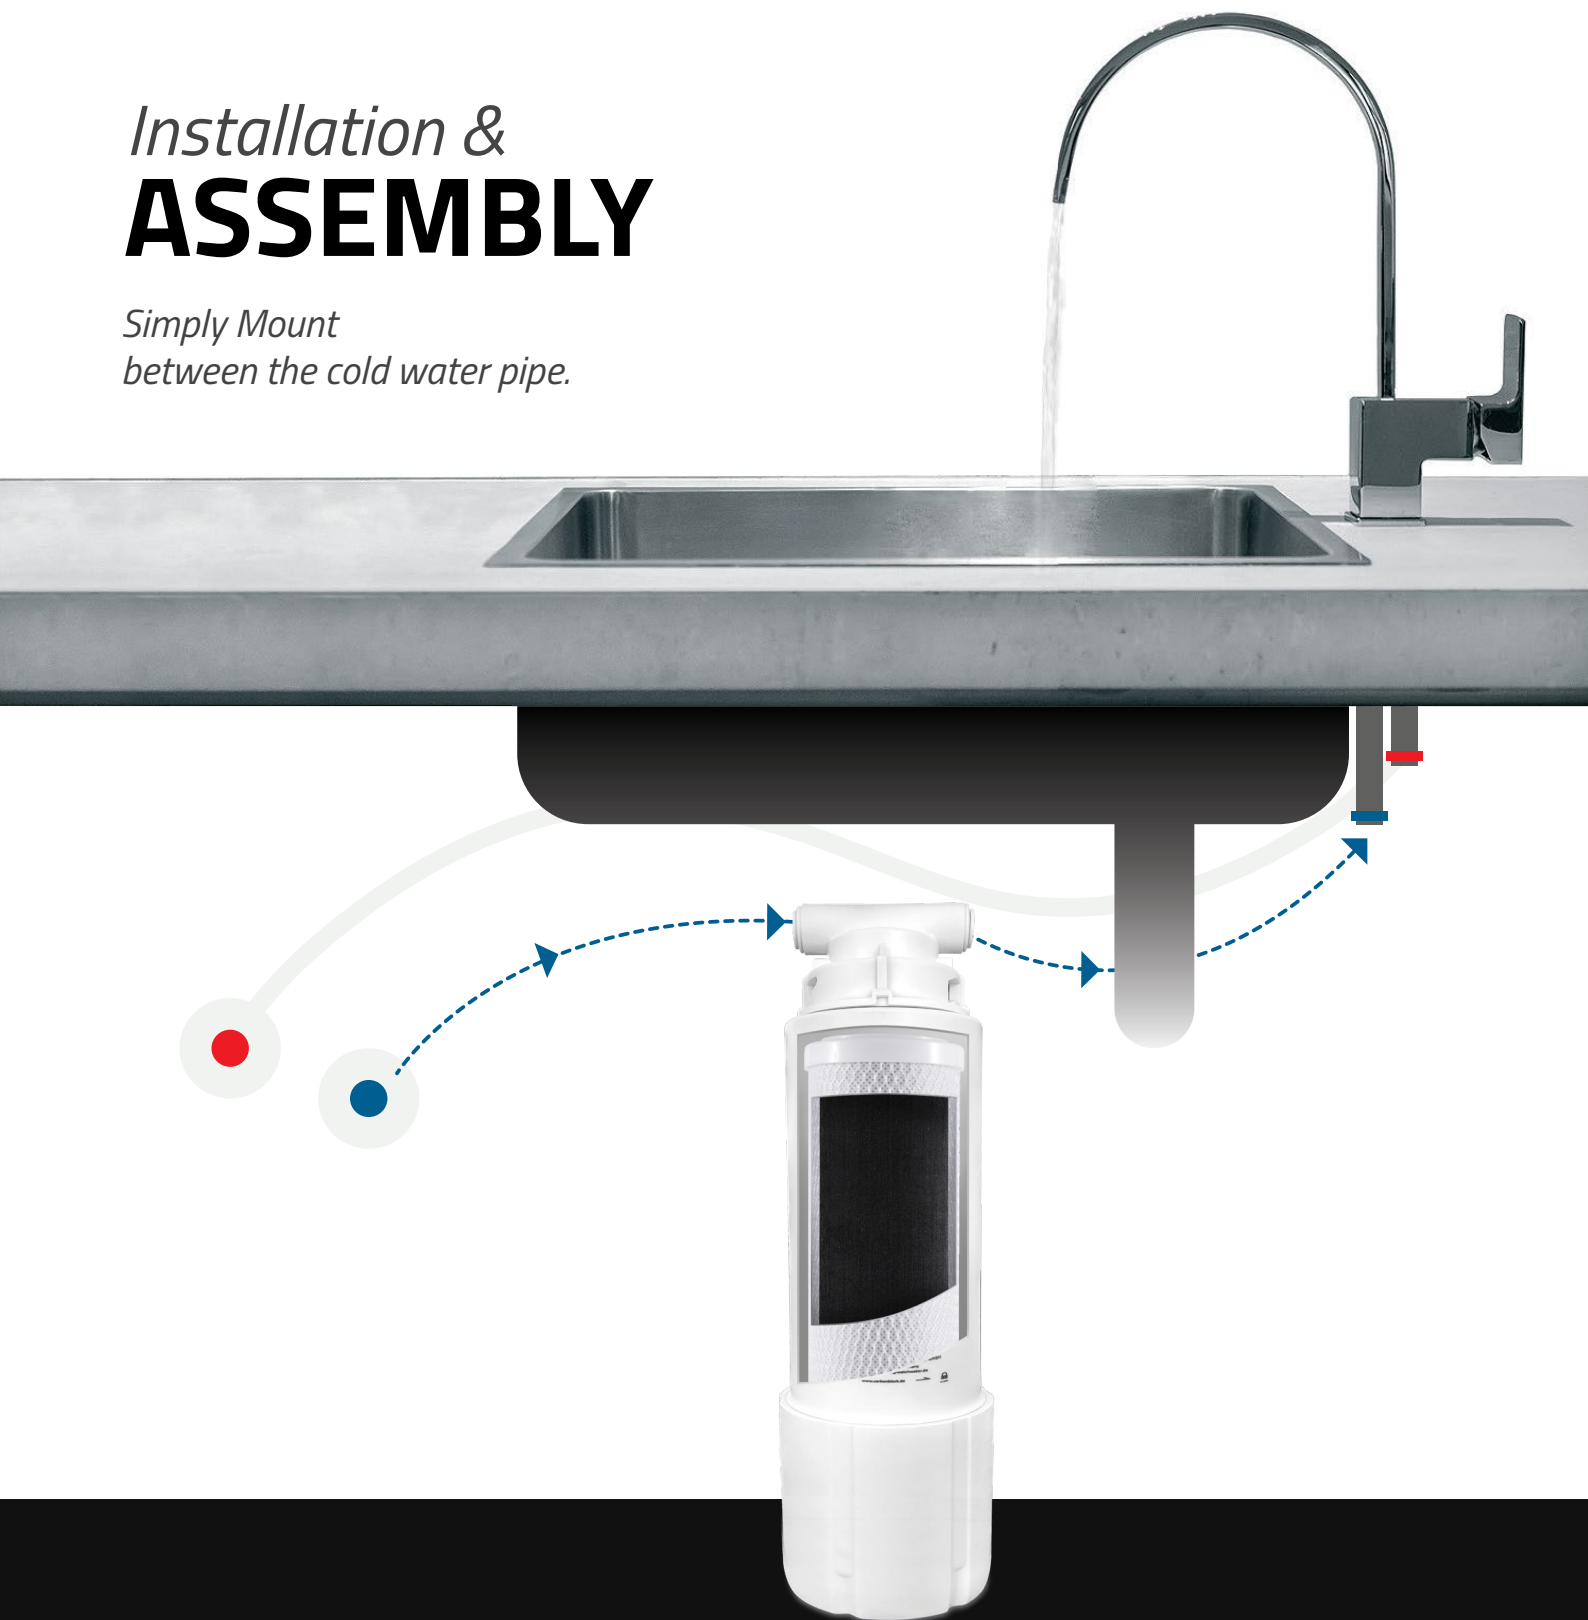

COMPACT POU SYSTEM WITH POWER OF TITANSORB-P

INSTALLATION MANUAL

Installation & **ASSEMBLY**

*Simply Mount
between the cold water pipe.*

WARRANTY / SAFETY REGULATIONS:

Prior to commissioning the filter, it must be inspected for any signs of damage. Please notify us promptly upon receiving the shipment if any visible defects are observed. Our general terms and conditions apply.

IN THE BOX (WITHOUT INSTALLATION KIT)

- (A) 1x CarbonBlock TS3 Filter**
- Optional – Installation Kit**
- (B) 1x Flexible Hose 1, 3/8" Union Nut on Both sides**
- (C) 1x Flexible Hose 2, 3/8" Male Thread 3/8" Union Nut**
- (D) 2x Transition Piece 3/8"**
- (E) 2x Safety Clips**

**Installation kit is not included and must be purchased separately.*

02 PREPARATION

Take your new CarbonBlock TS3 filter and find a suitable place under the sink for it. Make sure that this is within reach of the cold water connection. Unscrew the flexible hose attached to the cold water connection.

(Tools required: 19 mm open-endwrench)

01 TURN OFF THE WATER

Turn off the cold water connection under your sink (usually marked with a blue dot) so that no more water can flow. Open the faucet to drain. Place a bucket under the hoses to catch any leaking water and avoid puddles.

03 FLEXIBLE HOSE 1

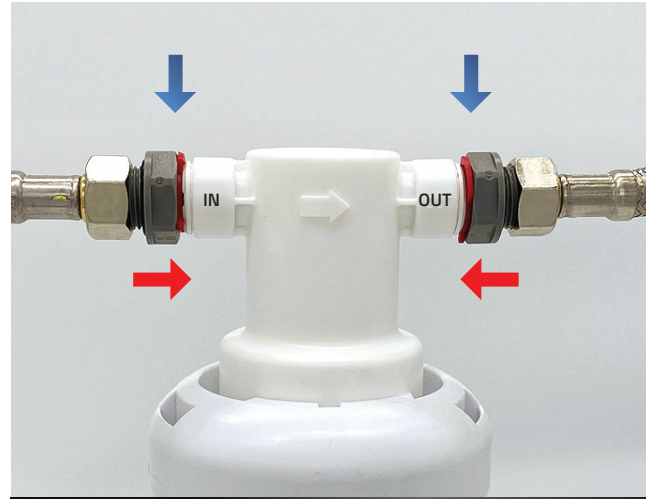

Fasten the flexible hose 1 (with union nuts on both sides) to the cold water connection.

Tighten the hose sufficiently with the 19mm open-end wrench.

04 FLEXIBLE HOSE 2

Now connect the flexible hose, which was detached from the cold water connection in step 2, with the supplied flexible hose 2. Use the end of the hose with the external thread.

05 CONNECT THE FILTER

Insert the two transition pieces into the filter head (red arrows). Put on the safety clips (green arrows). Connect the flexible hose 1 coming from the cold water connection to the threaded connection at the filter inlet (marked "IN"). Connect the end of the flexible hose 2 coming from the water tap to the second threaded connection on the filter (marked "OUT").

06 FINAL

Ensure all connections are securely tightened. Open the cold water supply to allow water to flow through the system. Flush the filter for 2–3 minutes until the water runs clear. Check all connections carefully for any leaks. Do not use the water system if any leaks are detected upon installation.

**HAVE FUN WITH
YOUR FILTER,
IT IS NOW READY
FOR USE...**

Note:

Before performing any maintenance work, make sure to manually shut off the water supply completely. This system does not include an automatic shutoff valve, so verify that the water is fully turned off to prevent leaks or water damage during service.

Simply *Comfortable*

Would you like fresh, clear and tasty water?
And without lugging water crates or bottles?

With the CarbonBlock TS3 water filter, you will have more time for the finer things in life & benefit from tasty, perfectly purified drinking water from your tap. Your Water will be optimized within your own four walls, the smell & taste will be improved and a wide variety of dirt particles and other contaminants will be reliably removed - 24 hours a day, 7 days a

YOUR BENEFITS

Our water filters...

- Generate tasty drinking water
- Eliminate & reduce pollutants in a targeted manner
- Effectively improve the taste & smell your water
- Make lugging water crates unnecessary
- Save water purchases
- Are quick and easy to install
- Are easy to change
